SABRE®

BATHROOM

As a brand, Sabre Hardware has been a part of the architectural construction supply landscape for over 40 years. Originally launched by Specialty Hardware in Sydney, Sabre became part of the family-owned Access Hardware Group in 2010, facilitating more product investment and development to meet changing market demands.

Our strategic partnerships with manufacturers in the United States, China, Taiwan and Australia have been a cornerstone of our ability to meet customer needs. We will continue to invest in these partnerships to deliver on our mission statement; to always strive to offer quality hardware solutions at the right price. Before a product is branded Sabre, it is rigorously tested to ensure it meets market expectations.

The Sabre product range covers common product categories such as door controls, locksets, entrance handles, general hardware and commercial washroom equipment. Sabre branded products are dispatched daily to all states and territories from Access Hardware branches around Australia. To discuss a solution to you hardware needs, contact your nearest Access Hardware branch on 1800 555 600 to speak with an experienced customer service or sales representative.

GRAB RAILS & BACK RESTS

SUITABLE FOR COMMERCIAL AND RESIDENTIAL WET AREAS

The Sabre range of grab rails and back rests have been developed to meet the safety requirements for those with physical disabilities. Our products comply with the Australian standard AS1428.1-2009. All rails are made from secure 1.2mm thick, 32mm diameter 304 stainless steel tube. All mounting plates provide 5 fixing positions to ensure easy mounting to various building surfaces and have 77mm diameter concealed twist and lock covers. The twist and locks mechanism makes it difficult for the covers to come loose when installed correctly. All back rests are site adjustable to ensure installation meets the approved standard for height and positioning. The comfortable padded section is made from polyurethane which is hygienic and easy to clean.
Note: It must be noted that some rails are handed so it is important that careful consideration is made before ordering.

TWIST AND LOCK ROSE COVER

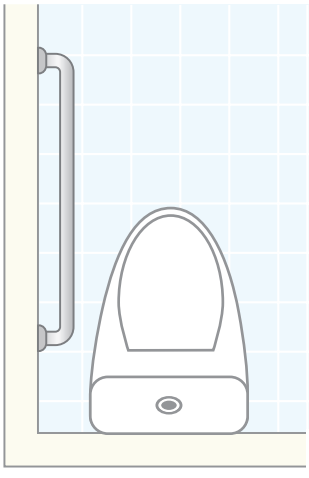

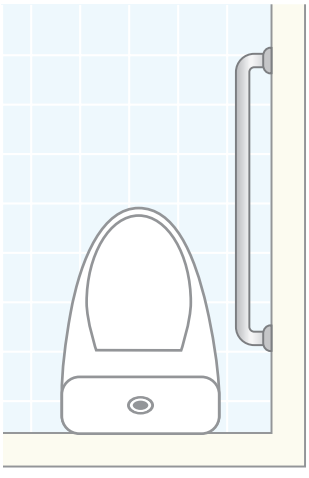

GRAB RAIL HANDING GUIDE

When seated, the handing of the rail is determined by the side which the rail is mounted. If the rail is mounted on the left hand side then it is left hand. Opposite for right hand.

All straight rails and back rests are non-handed.

BRAILLE SIGNAGE

The Sabre range of braille signage is made from 1 piece injection moulded ABS Plastic. ABS Plastic is well known for its resistance against corrosive chemicals and physical impacts. All signs are compliant to AS1428.1 – 2009 and BCA, Access to Premises, schedule 1 Part D3.6 and D4 – 2010.

Handing Guide: When determining the handing of the braille signage, refer to the Grab Rail Handing Guide

SIGN LOCATION

- Signs must be located not less than 1200mm and not higher than 1600mm above the floor or ground surface.
- Signs with single lines of characters must have the line of tactile characters not less than 1250mm and not higher than 1350mm above the floor or ground surface.
- Identifying signs must be located on the wall on the latch side of the door, with the leading edge of the sign located between 50mm and 300mm from the architrave.
- In the case of insufficient space on the latch side, the sign may be placed on the door itself.

LIQUID SOAP DISPENSERS

SUITABLE FOR LIQUID SOAPS, SHOWER GELS AND SHAMPOO

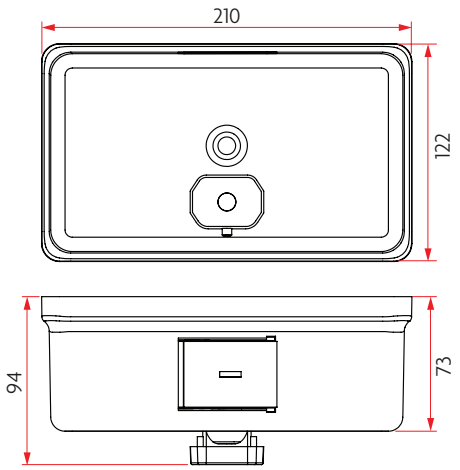

The Sabre range of liquid soap dispensers have been developed to meet the demand for a suitable liquid soap dispenser that can be used within commercial projects. Sabre liquid soap dispensers are created with a sleek modern design in mind and are made from Stainless Steel with a satin finish.
The easy to use and dispensing system has been cycle tested to exceed 500,000 operations and has been designed with a lockable lid to prevent tampering.
The 1.2L capacity dispenser comes standard with a plastic insert to help protect against corrosive soaps. Its complementing design in both horizontal and vertical layouts are to ensure they suit a variety of commercial applications when required.

* Not suitable with any alcohol or iodine based soaps or liquids.

When installed in the correct manner this product can meet AS1428 requirements. This product shall be installed with the height of the operative component not less than 900mm and not more than 1100mm above the finished floor, and no closer than 500mm from an internal corner.
